

three of language, and one of plane geometry are specifically required. As few of the high schools of Kansas give three years of history, it will be necessary for a large number of the law students to become special students in the College to make good one or more entrance deficiencies.

DRAMATIC CLUB

The University Dramatic Club, under the direction of Professor E. G. Frazier, presented Wm. Gillett's four-act comedy, "All the Comforts of Home," at the Bowersock opera house, March 7. No other play ever presented by the club has been more successful.

THE GYMNASIUM

Work will begin on the new gymnasium about July 1. The building will include both a gymnasium and an auditorium. The plans submitted by Dr. Naismith will probably be carried out, with the necessary changes that will be made by the architect. Dr. Naismith's plans are for a building one hundred feet by one hundred and fifty feet, with an elevation of fifty-six feet, comprising two stories and a basement.

The basement will include lockers, bath rooms, dressing rooms, a baseball cage, and a swimming pool.

The first floor will contain the gymnasium proper. The gymnasiums for the boys and girls will be divided only by wire screens, which can be removed at any time so as to throw the two rooms into one. This floor will also contain rooms for boxing, fencing, and wrestling, and apparatus rooms.

The entire second floor will be occupied by an auditorium, with a capacity for seating three thousand people. The gallery will be built around the four sides of the room, and in this will be a running track one-sixteenth of a mile in length. The main floor, when cleared, will furnish ample room for any indoor sports, and the auditorium will thus be suitable for indoor meets.
