KUMC's study of a mysterious enzyme

Researchers for KUMC's Department of Biochemistry and Molecular Biology are unraveling a labyrinth of data about a complex enzyme called phosphorylase kinase. The Journal of Biological Chemistry has identified their paper on the enzyme as one of their best articles of 2012.

TODAY'S HEADLINES

New training for student teachers

A professor of curriculum and teaching has authored a study advocating that community-based field experience as a third space of education would provide more well-rounded teachers and complement the traditional spheres of teacher education.

February Employees of the Month

KU has bestowed Employee of the Month honors for February on a support staff member who helps law students find employment and an unclassified staff member who oversaw restoration for the water-damaged Murphy Art & Architecture Library.
