CReSIS work cited in major climate study

A collection of breakthrough discoveries that provide new details on changes in the Earth’s climate from more than 100,000 years ago — made possible in part by a team of researchers from KU — is featured in the most recent issue of Nature, one of the world’s most prestigious scientific journals.

TODAY’S HEADLINES

KGS issues Hodgeman County map

Limestone used for fence posts, sediment washed off the Rocky Mountains millions of year ago and hundreds of natural, intermittent playa lakes of uncertain origin are among the geologic attributes featured on a new map of Hodgeman County.
