John Sehrajg continues his studies at K.U. this year. Henry J. K. S., Lawrence, Donald F. Showalter, Ph.D., heads the department of education at the Arkansas State A. & M. College. Frederick Trillingham, b., is enrolled in the graduate school at K.U. His address: 1233 Tenn. St., Lawrence.

Faculty

Dr. E. H. S. Bailey has gone to be at the home of his son Herbert for the winter. Address: 1122 N. Euclid, Ontario, Calif.

Dr. and Mrs. L. B. Burdick will make a tour of the world in the spring of 1953. They will go out of the Army—Louisiana State baseball game. While at West Point he met Charles Brooks, a.s.t., formerly of Atkinson, who is a cadet and is on the Army squad. Herb Peterson, D.M., rooms with Bob.

Marlen Drake has a teaching position at Obion.

Otto F. Frederikson, Ph.D., is a professor of history and social science at the State Teachers College, Hammondsburg, Va.

Helen Henson contracted the rare and dangerous Maltese fever in Kansas City where she has been bacteriologist at Manoa Hospital since graduating in the spring of last year. The last report from Helen indicated that she was recovering, but complications accompanying the fever made its treatment difficult and recovery slow. Helen is at her home in Jolita.

Frank McGlelland was nominated for attorney general of Kansas on the Socialist ticket, but since Frank is a socialist and not a lawyer, the party changed his place on the ticket to Lieutenant Governor. Said Frank, "This attitude, I feel, is entirely justified, and I am altogether willing to change." At present, Frank is attending K.U. on a fellowship in sociology.

Bill Nichols, reporter on the Larned Tiller and Toilet, journeyed with his mother to Lawrence the first week in December to see Raymond Nichols, '26, who was in a hospital for an operation.

Rouven Partridge, f.s., and her beautiful voice are appreciated out in her home town of Delphos. Since leaving the University she has kept on with her voice training and Dec. 29 gave a recital in Delphos which drew 400 persons.

She sang Italian, German and American songs and received for her efforts the warmest praise.

Archie T. McDonald, 1, practices with the law firm of Anderson & McDonald, McPherson.

W. L. Peters, e., and Mrs. Peters get in touch with the alumni from out in Huntington Park, Calif., where they live at 2171 C. Rita Ave. They seem to be in good health and good spirits, and fast getting the California complex, for they end their letter with, "With you folks back there could be out here to enjoy this grand weather. Last week we went to the mountains near you in February, and in two hours from sunshine and warmth we were in snow up to our knees and it was colder than the dungeon." Have they forgotten how in Kansas the weather changes many times from spring-like atmosphere to a blizzard almost in the twinkling of an eye?

Dr. C. F. Nelson, head of the department of biochemistry, has published a paper on the Topeka Dental Society, "Calcium Metabolism in Health and Disease," was his subject.

Prof. J. H. Nelson, of the department of English, suffered two falls during his vacation, one of which resulted in what was believed to be a concussion of the skull. He was absent from his class for some weeks, but it now on the job again though not fully recovered.

Prof. N. Raymond, instructor of English in the School of Engineering, was elected president for the coming year of the Lawrence Sons and Daughters of New England.

Dr. C. V. Redman, formerly industrial fellow at K.U. and now vice-president and director of research of the Bakelite Corp. of New York City, has been awarded the Griswold Medal as a tribute of distinction for his researches on the plastics by the American section of the Society of Chemical Industry, a British organization. Dr. Redman is President-elect of the American Chemical Society.

Prof. H. E. Underhill, of the Business Placement Bureau of the School of Business, went on a two-day job hunting trip Dec. 8 in the interest of students needing Christmas vacation jobs. He took in Kansas City, Atchison, and Hutchinson. It is true that paying jobs are scarce and most of them are commission jobs," said Underhill, "but of last year's graduates only 16 are unemployed. Twenty-eight are with corporations; 11 are with private businesses; 9 are doing graduate work; and 4 are teaching school. We have an equally good record this year in spite of the poor business conditions."

Prof. Raymond H. Wheeler, head of the department of psychology, has a book coming out, "The Laws of Human Nature." It has already been issued in England by the Norton Co. as part of a series published under the title, "Contemporary Library of Psychology." In America it appears by itself, published by Appleton. The book is a presentation of organismic and configurational psychology in non-technical language, and in its relation to the more general problems in physical and biological science on one hand and social sciences, ethics, and education on the other, according to Doctor Wheeler.

Prof. E. A. White, of the department of chemistry, was in New York last week experimenting with a salt that produces 98.85% pure carbon dioxide gas. It is from this gas that dry ice is made simply by compression and quick release. Prof. White says that dry ice may be made from this salt ten times cheaper than by ordinary methods. It may have a far reaching effect on the dry ice industry and on refrigeration generally.

Help on Unemployment Committee

The December Graduate Magazine carried only a partial report of the part played by Faculty on the Governor's unemployment committee. Both Dean F. T. Stockton of the School of Business and Prof. R. H. Wheeler of the department of psychology are members of the Committee. Dean Stockton is also a member of the executive committee and is economic adviser in the general conversation. Prof. W. F. Kistick of the School of Business being technical adviser appointed Nov. 6. Prof. D. J. Tevelde also of the same school, was made technical adviser Dec. 22 and assigned to report on management policies and educational programs that could be established in the state to stimulate the effectiveness of the depression.

Take Part in Professional Societies

Unusual members are those who are doing their best to keep up their professions during the Christmas holidays when many of them journeyed to far scattered meetings.
