Exploration

Maps as Travel Guides

De l'Ile de Madagascar.

Cette Ile s'étend du Nord-Nord-Est au Sud-Sud-Ouest au delà de la Ligne commençant vers le 12 degré quelques minutes de la Latitude Meridionale, & finissant au 26. degré ou environ. C'est une des plus grandes Iles du monde: sa longueur du Midy au Septentrion est d'environ 200. lieuës d'Allemagne, & sa largeur en certains endroits est d'environ 100 lieuës de France. Elle comprend diverses Regions ou Provinces dont Machicore est la plus grande de toutes. La côte de l'Ile est divisée par des Rivieres, qui prenant leur source dans le pays & qui viennent se decharger dans la Mer. La Province d'Anossi, dans laquelle est situé le Fort Dauphin, s'étend depuis le 25 degré de Latitude jusqu'au 26°. La Campagne en est par tout également belle & fertile en paturages, & le terroir excellent pour les arbres fruitiers. Elle est arrosée de la riviere de Fransbere, qui a près de son embouchure une baye très commode pour les Vaisseaux. Ce fut l'an 1674. que les françois commencerent à se fortifier sur la pointe la plus meridionale de cette Province. Ils bâtirent sur le rivage une forteresse qu'ils nommerent le Fort Dauphin, & y établirent une Colonie, après avoir reduit par la force des armes toute la Province sous leur domination. Le fort est sur l'une des pointes de la Baye de Tholangare, à 25 degrez 6. min. vis à vis du Cap d'Itapere qui fait l'autre pointe. On a dressé plusieurs habitations derriere ce fort vers de la maison du Gouverneur, avec un grand enclos, qui produit toutes [illegible] & d'herbes potageres. Mais la haine des habitans du pays contre les [illegible] a abandonné cet établissement

Des Peuples de l'Ile de Madagascar.

Il y a dans l'Ile de Madagascar & dans la Province d'Anossi deux sortes de peuples, des blancs & des Negres. Les premiers, qui se sont venus habituer dans cette Ile depuis un peu moins de 200 ans se nomment Rabimina, du nom d'Imina qui fut la mere de Mahomet, dont ils se disent les descendans. Les Negres sont tout nuds, excepté un linge dont ils couvrent leurs parties naturelles, comme on le peut voir dans les figures ci-jointes. Les Blancs ont des habits de diverses couleurs, les uns de soye, les autres de cotton, les uns rouges & les autres ravez de blanc &c. Ils en portent aussi de ce qu'on appelle écorce d'arbre. Chaque homme peut épouser autant de femmes qu'il en peut nourrir & l'adultere ne passe parmi eux que pour un simple larcin. Aussi dit-on que les femmes de ce pays-là ont toujours, outre leur mari, deux ou trois amis qui partagent leurs faveurs, les filles en sont encore moins avares. Elles s'abandonnent à qui les veut payer, car elles ne donnent rien gratis: & si on ne les paye même sur le champ, elles se jettent sur le galant & le depouillent. Ces peuples ne regardent pas la fornication, ni comme un peché devant Dieu ni comme un scandale devant les hommes. Une fille au contraire ne voudroit pas être mariée avec un homme, qui ne lui auroit pas donné plusieurs fois avant le Mariage des marques de sa virilité, sans doute de peur d'y être trompée. Si elle n'en faisoit l'essai qu'après être engagée [illegible] on veut voir dans la Dissertation sur [illegible] de ses habitans.

O'REILLY® Short Cuts

Introduction to Neogeography

By Andrew J. Turner

Copyright © 2006 O'Reilly Media, Inc.
ISBN: 978-0-596-52995-6
Release Date: December 15, 2006

Neogeography combines the complex techniques of cartography and GIS and places them within reach of users and developers.
This Short Cut introduces you to the growing number of tools, frameworks, and resources available that make it easy to create maps and share the locations of your interests and history. Learn what existing and emerging standards such as GeoRSS, KML, and Microformats mean; how to add dynamic maps and locations to your web site; how to pinpoint the locations of your online visitors; how to create genealogical maps and Google Earth animations of your family's ancestry; or how to geotag and share your travel photographs.

Association for Geographic Information

Conference programme: Day One

	Ballroom	Packwood	Charlecote	Harewood
10.30–10.40	AGI 2007 Chairman's Welcome			
10.40–11.10	Plenary Keynote 1: GI – Past, present and future Chair: Alun Jones, AGI Chairman Speaker: Ed Parsons, Geotechnologist, Google			
11.10–11.40	Plenary Keynote 2: GI – Past, present and future Chair: Alun Jones, AGI Chairman Speaker: Mike Hickey, President of Pitney Bowes MapInfo			
11.40–11.55	QUESTIONS			
11.55–12.00	Overview of structure of sessions			
12.00–12.30	Show me the Money: Making the CEO listen Andy Coote, Director of Consultancy, ESRI	Datums, Datums, Datums…the UK Vertical Offshore Reference Frame John Pepper, Head of GI Services, UKHO	Will GI Technology ever lift World Reference Atlases off the printed page? Jim Irvine, Head of Digital Resources, Harper Collins	RESERVED – TBC
12.30–2.00	LUNCH	LUNCH	LUNCH	WORKSHOP: Metadata for the Masses Keiran Millard, Group Manager – Informatics, HR Wallingford WORKSHOP: Delivering GI to Mainstream GeoCommunities Andrew Terry, Manager, Centremaps
2.00–2.30	National GI Strategies – International Lessons Learned for the UK Robin McLaren, Director, Know Edge Ltd	Using Geo-demographics to Predict Social Needs Tony Duckenfield, Associate, Steer Davis Gleave	Providing a Platform for Interoperability in a rapidly evolving Geospatial context Gilbert Noordam, Senior Consultant, Bentley Systems	The GI Cornerstone of a £2.3 bn Insurance Business Nigel Mason, Business Development Director, MapInfo
2.30–3.00	Delivering on the Promise – Implementing the GI Strategy for Northern Ireland Trevor Stevenson, Strategy Director, OSNI	Using Geographical Data to Increase Patient Registrations Richard Wilson, Snr Public Health Information Specialist, S. Birmingham PCT	Benefits of a Data-centric Approach to GI Management Craig Moulding, GIS Manager, Caldendale District Council	Use of GIS in Near Real Time Assessment of Damage from Natural Catastrophes – How this can be used by the Insurance Industry Neena Seth, Risk Management Solutions
3.00–3.30	INSPIRE is Here! But what does it mean for the GI Community? Gesche Schmid, Principal Consultant, Atkins/LGA	The use of GIS in exploring access to general dental practices in Manchester Neil Bendel, Health Intelligence Manager, Manchester Joint Health Unit	NI Road Service: GI development from strategy to corporate implementation Ross Donaghy, GIS Manager, NI Roads Service	The use of Digital Mapping in Insurance Fraud Detection Kevin McDonald, Zurich
3.30–4.00	BREAK	BREAK	BREAK	BREAK
4.00–4.30	DEBATE 'GI is a bad career choice, discuss' Chair: Steven Feldmann	WORKSHOP: How do I build a location-enabled Web application? Ian Holt, Co-Founder, Widr	Location – Delivering Road Services to Customers Les Hawker, Divisional Manager, Transport Research Laboratories	RESERVED – TBC
4.30–5.00			Creating an Effective Highways Asset Management Plan Richard Budden, Consultant, Atkins	Integrating Web Services in Hybrid Applications: Can GYM members handle the GIS workout? Emese Csete, GIS Consultant, Atkins
5.15–5.45			AGI Corporate Overview and AGM	

Conference programme: Day Two

	Ballroom	Packwood	Charlecote	Harewood
9.30–10.00		Embracing Geography by Embracing Non-Geography James Procter, Information Standards Manager, Environment Agency	EU Environmental Directives and their Spatial Mapping Requirement Giles D'Souza, Senior Consultant, Infoterra	Using the Geocommunity as your Business Partner John Abbott, Co-Founder, Widr
10.00–10.05	AGI 2007 Chairman's Welcome			
10.05–10.35	Plenary Keynote 1: GI is Saving the World Chair: Steven Feldmann Speaker: Vanessa Lawrence, Director General and Chief Executive, Ordnance Survey			
10.35–11.05	Plenary Keynote 2: GI is Saving the World Chair: Steven Feldmann Speaker: David Maguire, Vice President, ESRI			
11.05–11.20	QUESTIONS			
11.20–11.25	Overview of structure of sessions			
11.25–12.00	COFFEE	COFFEE	COFFEE	COFFEE
12.00–12.30	Addressing Grand Challenges and Global Problems using Location Information Chris Parker, Head, Research Labs, Ordnance Survey	Interoperability through Sophisticated Database Loading and Extraction Jamie Justham, Managing Director, Dotted Eyes	Delivering Smarter Home to School Transport at East Riding of Yorkshire Council Andy Elliott, ICT Manager, East Riding of Yorkshire Council	The Business Case for Integrating Navigation with Enterprise GIS Peter Beaumont, Marketing Director – Enterprise Europe, Navteq
12.30–1.00	Persuasive Geospatial Computing Xavier Lopez, Director Spatial and Location Technologies, Oracle Corporation	Land Registration Analysis using OS Mastermap Paul Starkey, Director, TENET Technology	GIS – Enabling Local Government Work as One Peter Taylor, CAD/GIS Development Officer, Oldham Metropolitan Council	RESERVED – TBC
1.00–2.30	LUNCH	LUNCH	LUNCH	WORKSHOP: Is your Building the same as my Building? Simon Gomm, Technical Product Manager, Ordnance Survey WORKSHOP: Utilities: the integration of disparate Spatial Database Systems Kevin Challen, Business Development Manager, Infotech
2.30–3.00	OpenStreetMap – GeoData Provision for the 21st Century Nick Black, Developer, ZXV Ltd	Preparation and Improvement of a High-Resolution Detailed River Network for the Environment Agency Alexander Corey, GIS Technical Specialist, Environment Agency	Using Neighbourhood Profiles to Deliver Safer and Stronger Communities Trevor Adams, Senior Performance Analyst, Metropolitan Police	Land & Property: Putting GIS at the Heart of the Business Stephen Russell, Strategic Portfolio Manager, Midland Heart
3.00–3.30	A Web Application Deployment Model for OS MasterMap Data David Medyckyj-Scott, Manager, EDINA and Eddie Curtis, Chief Technical Officer, Snowflake	Meshing Marine & Terrestrial GI: Interoperability; CMIP and Seazone Hydrospatial Andrew Iwanoczko, GIS Analyst, SeaZone	GI & Policing Andrew Watson, Chief Information Officer, British Transport Police	Lessons Learned while taking a Geocentric Mashup to being a Business Ed Freyfogle, Chief Operating Officer, Nestoria
3.30–4.00	BREAK	Network Centric Mapping Database – Enabling Geospatial Updates for the Mariner James Ferguson, IT Architect, UKHO	BREAK	King's Cross Central GIS – using online collaboration to manage the land Muki Haklay, Senior Lecturer, UCL Filippo Campagna Popolo, Argent Group PL
4.00–4.10	BREAK			
4.10–5.10	BIG DEBATE 'Will Neogeography crush professional GIS?' Chair: Jeff Thurston			
5.10–5.20	Conference Roundup and best paper Steve Feldmann			
5.20–5.30	Conference Close by AGI Director			

AGI reserves the right to alter this conference agenda at any time.

NeoEconomics?

But what is

neogeography?

Neogeography isn’t...

- open-standards
- open-source
- analysis
- GIS

... but it can use these

towards a definition

neoclassicism

As an aesthetic and artistic style this originated in Rome in the mid 18th century

combining

a reaction against...

. In music, the term refers to a return by composers of the early 20th century to the forms and styles of the 17th and 18th centuries, as a reaction against 19th-century romanticism.

...with a new interest in antiquity

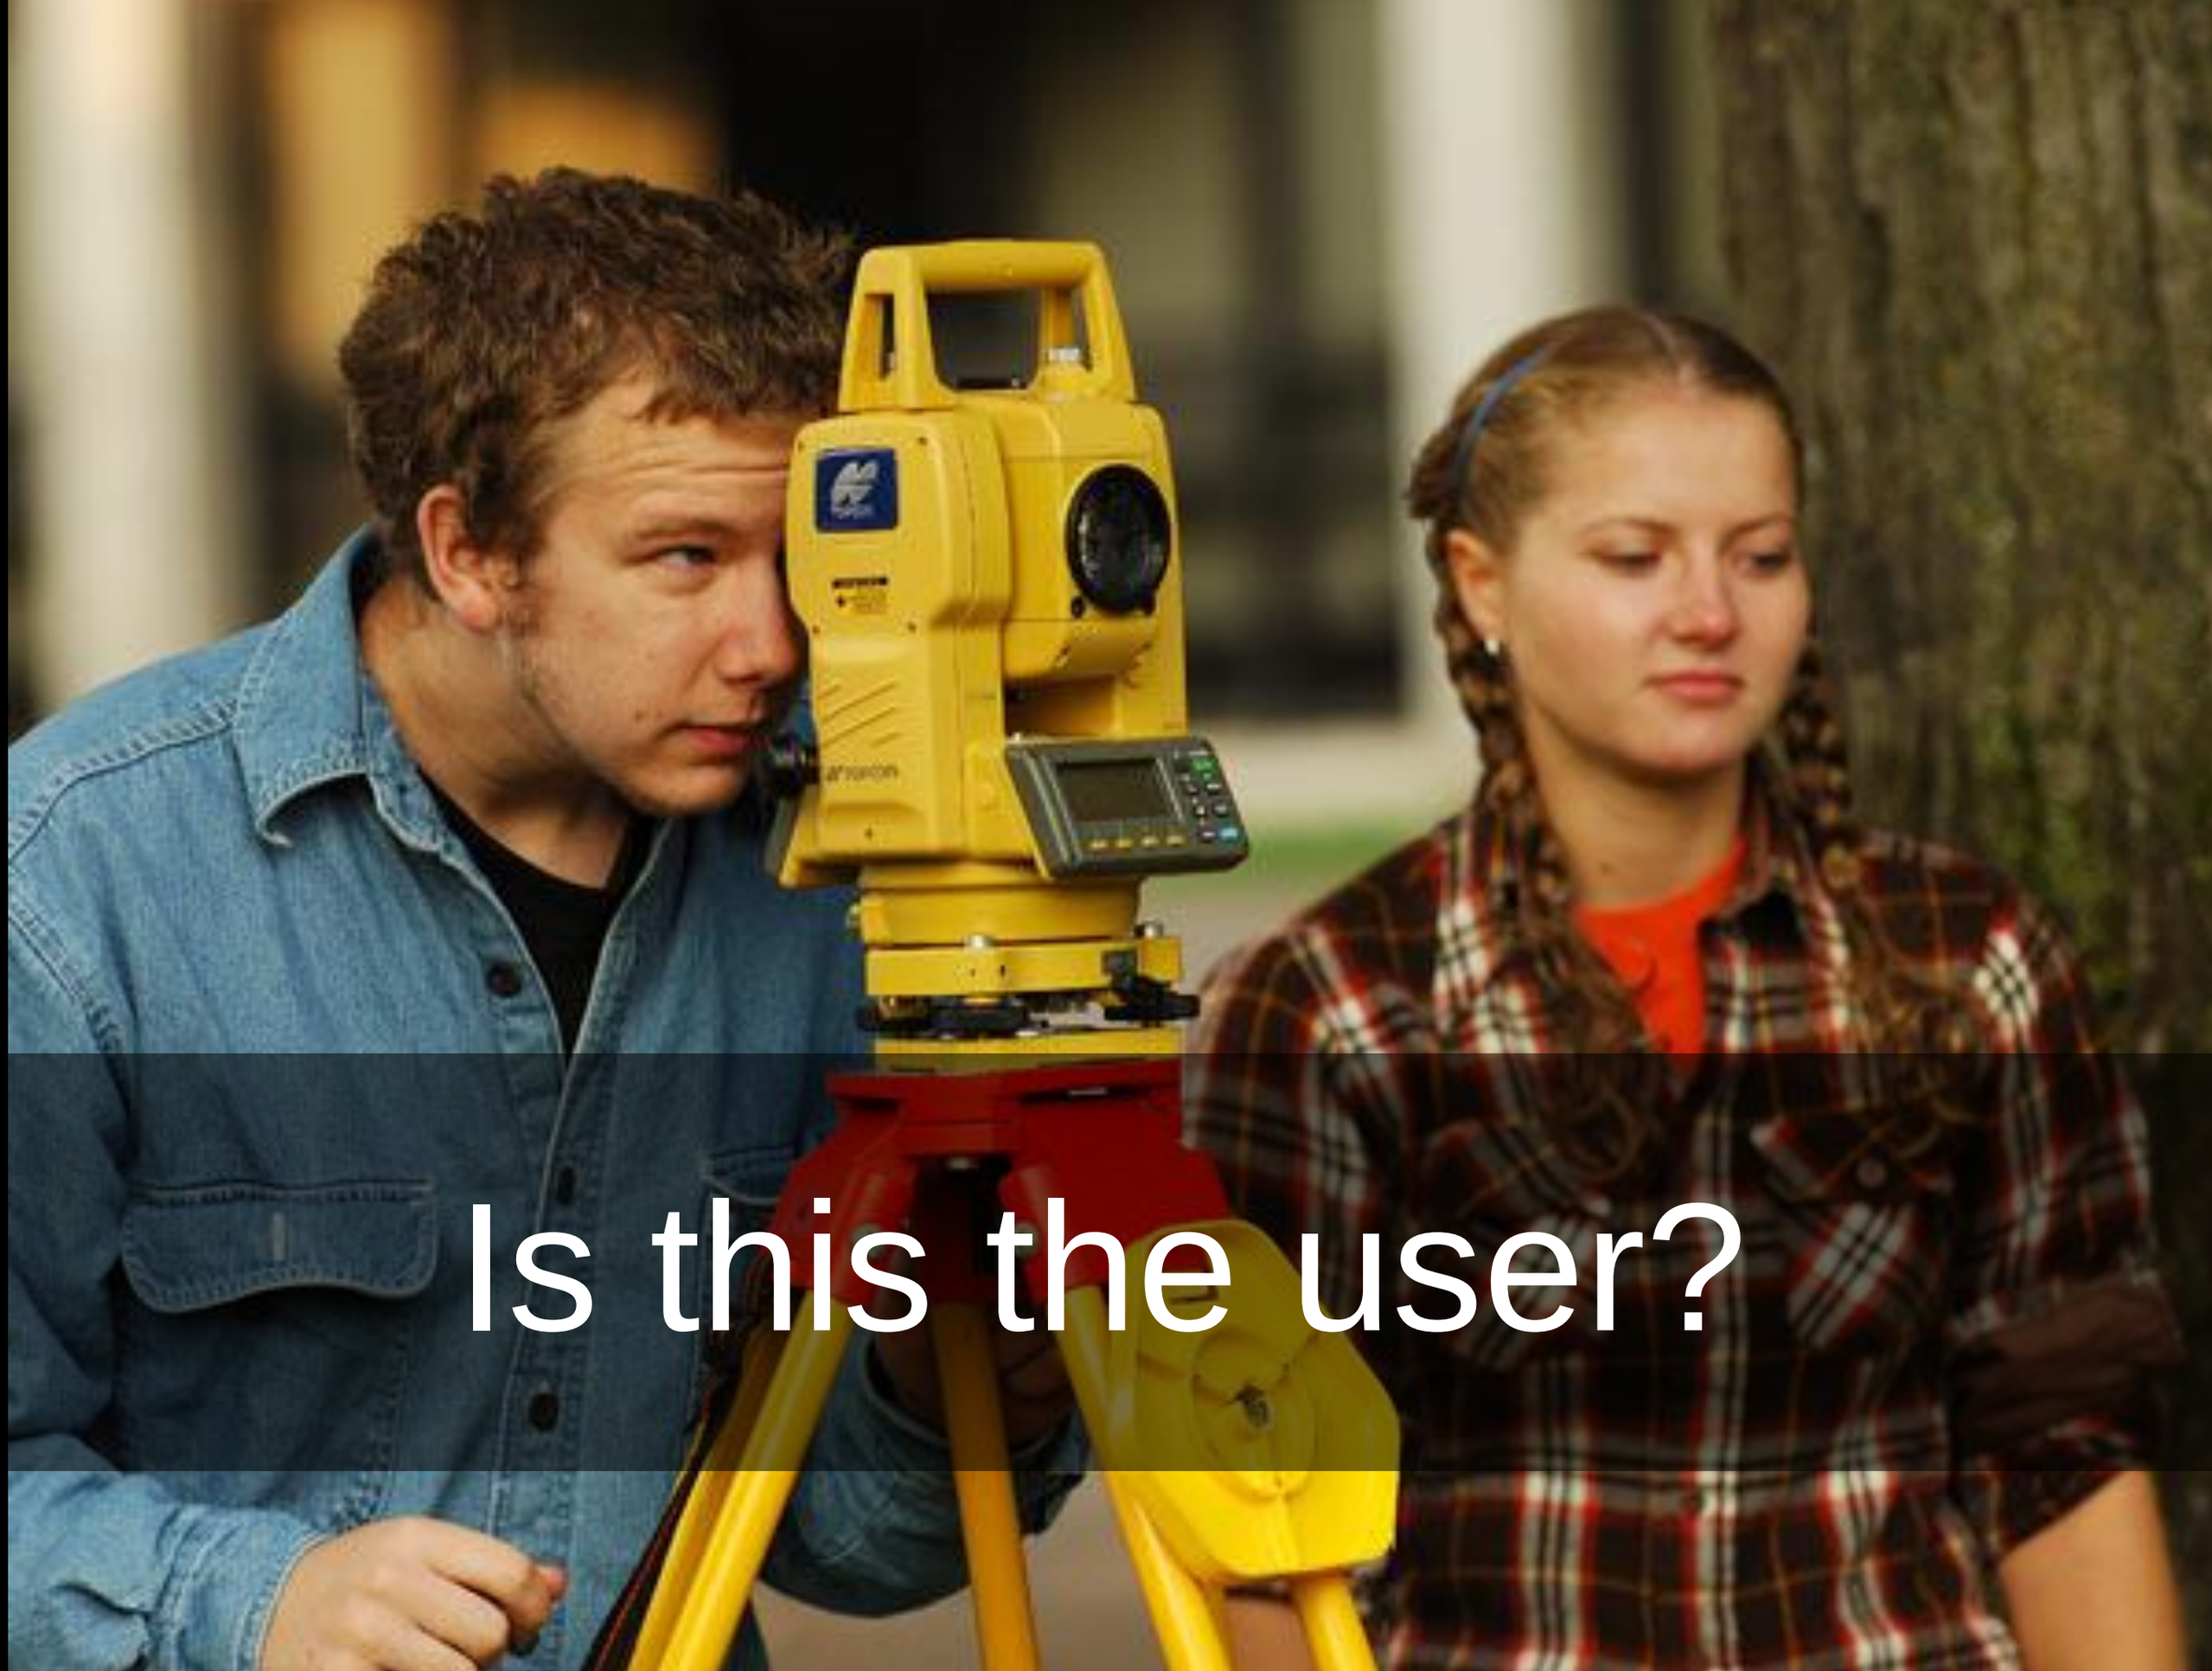
colloquial

used in ordinary or familiar conversation; not formal or literary.

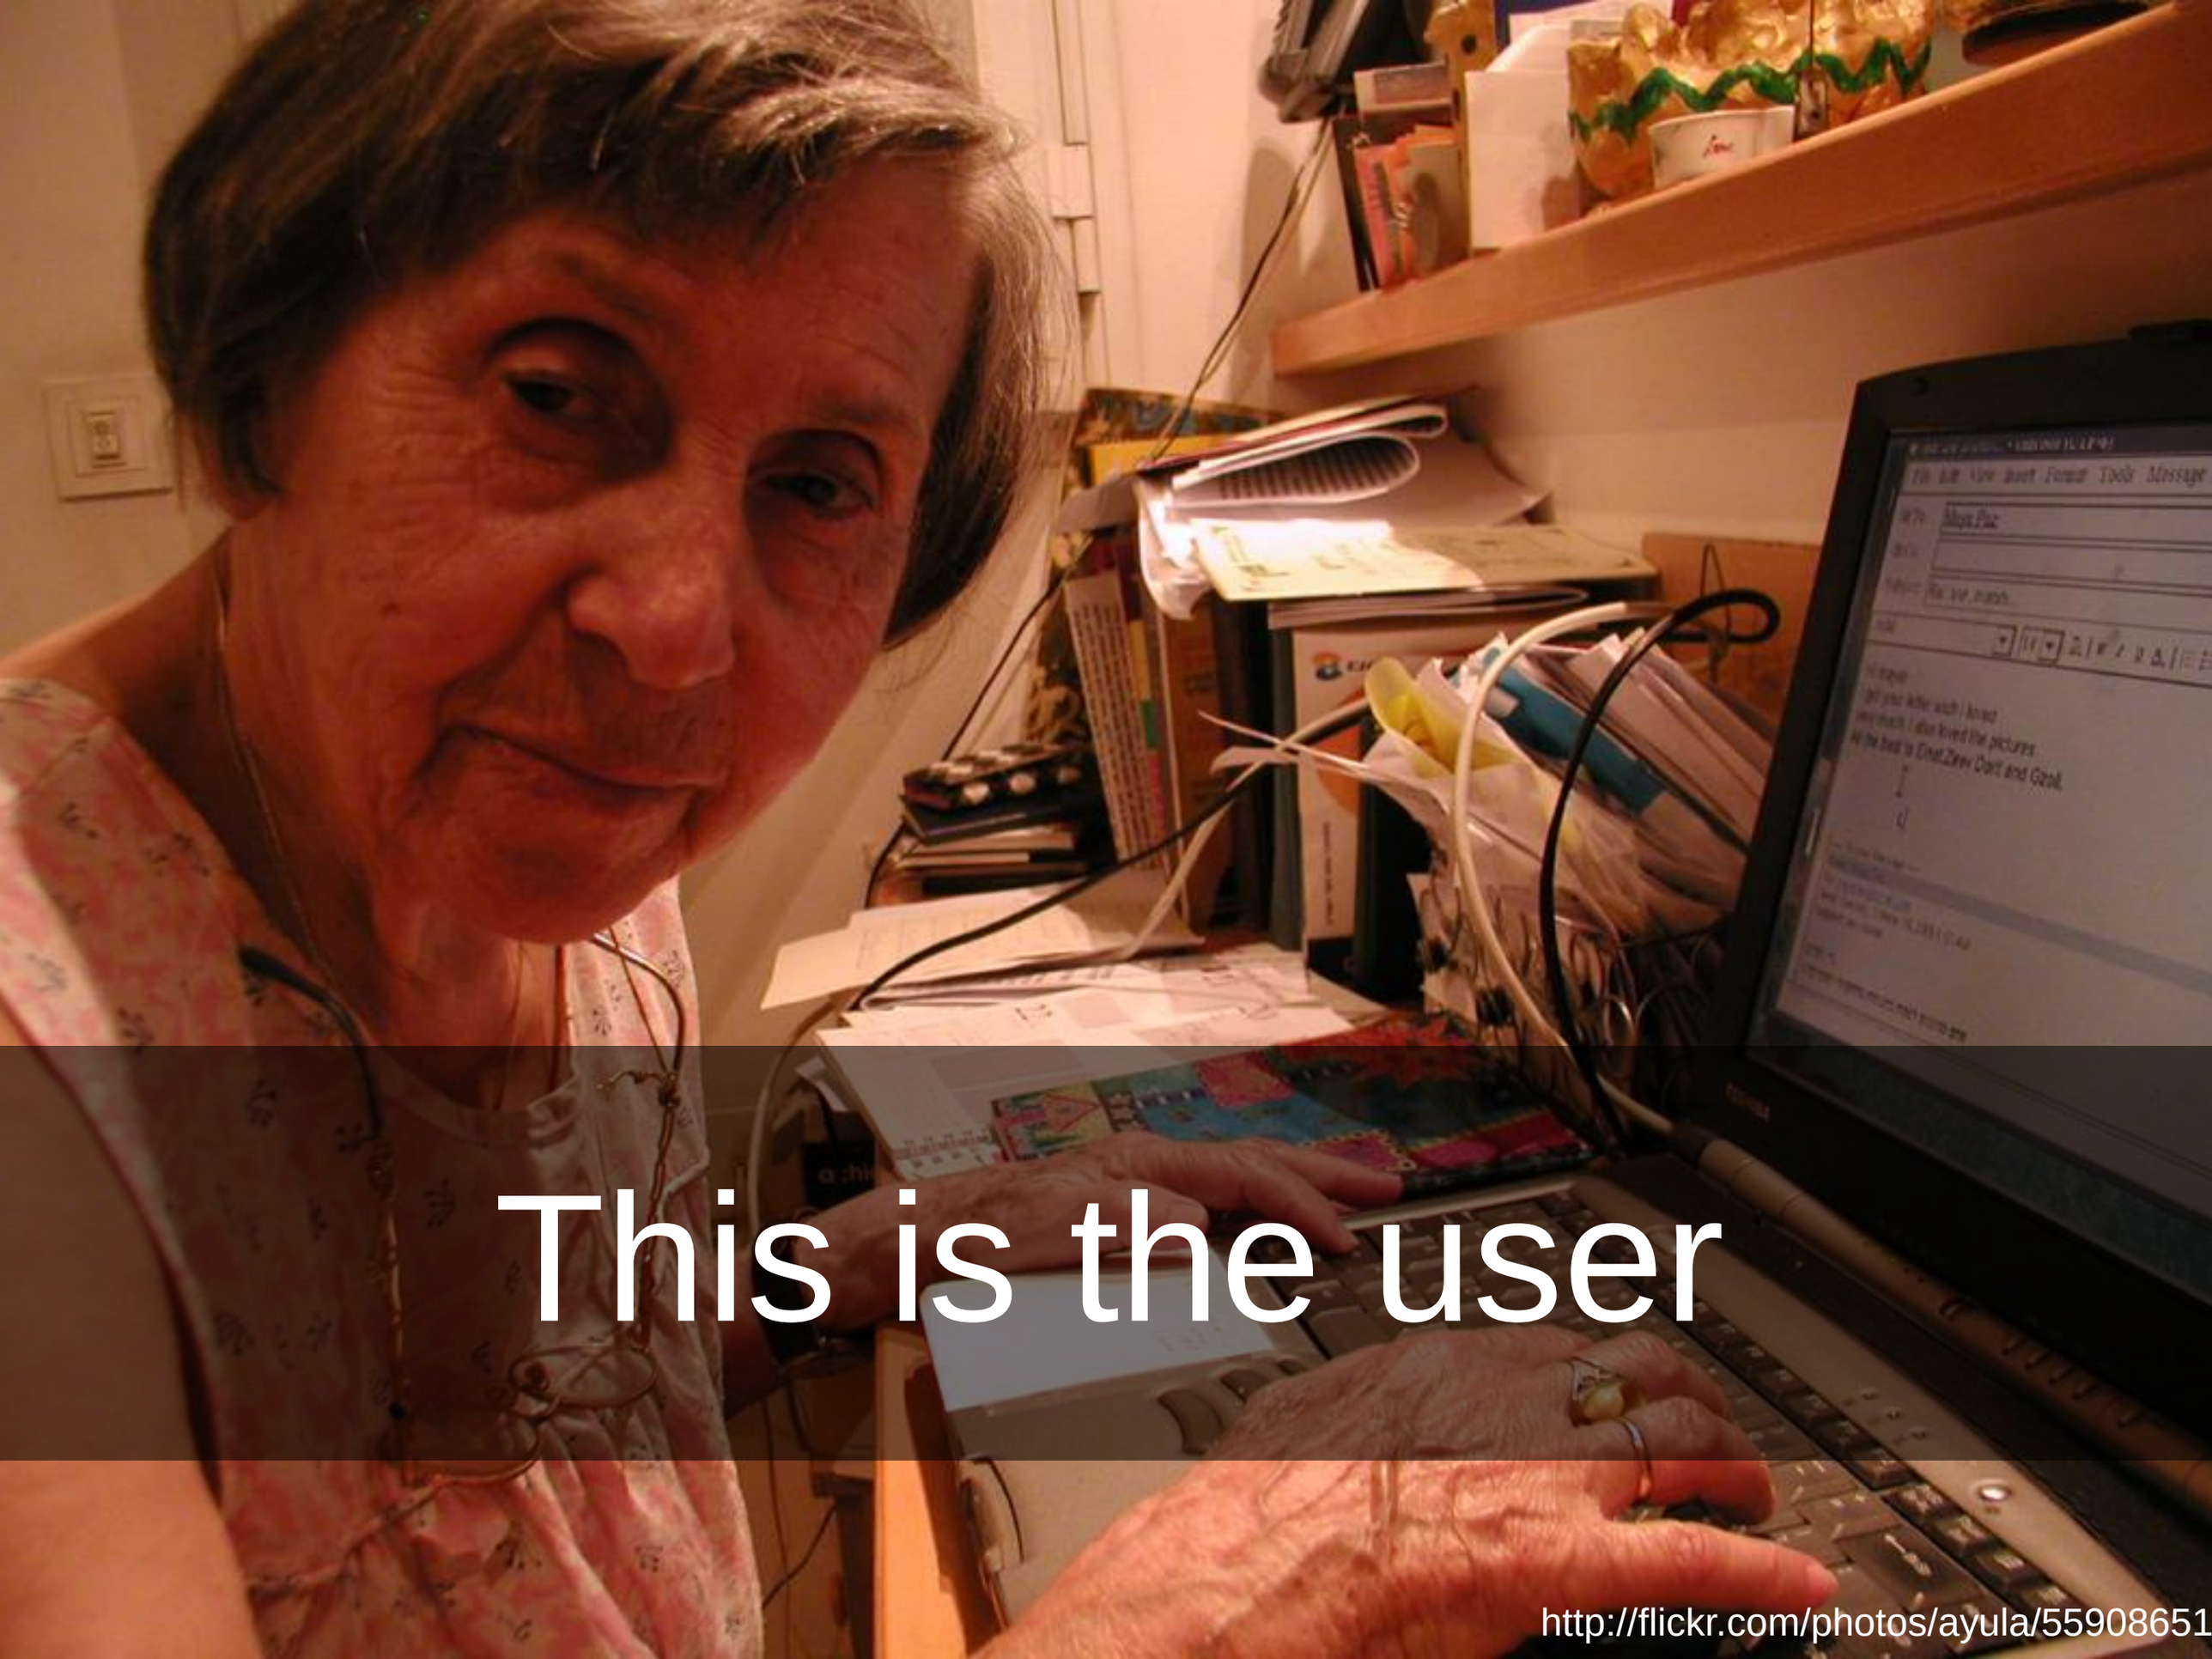
neogeography | nē'ō-jē-ŏg'rə-

geographical techniques and tools used for personal activities or for utilization by a non-expert group of users; not formal or analytical.

It’s about the user

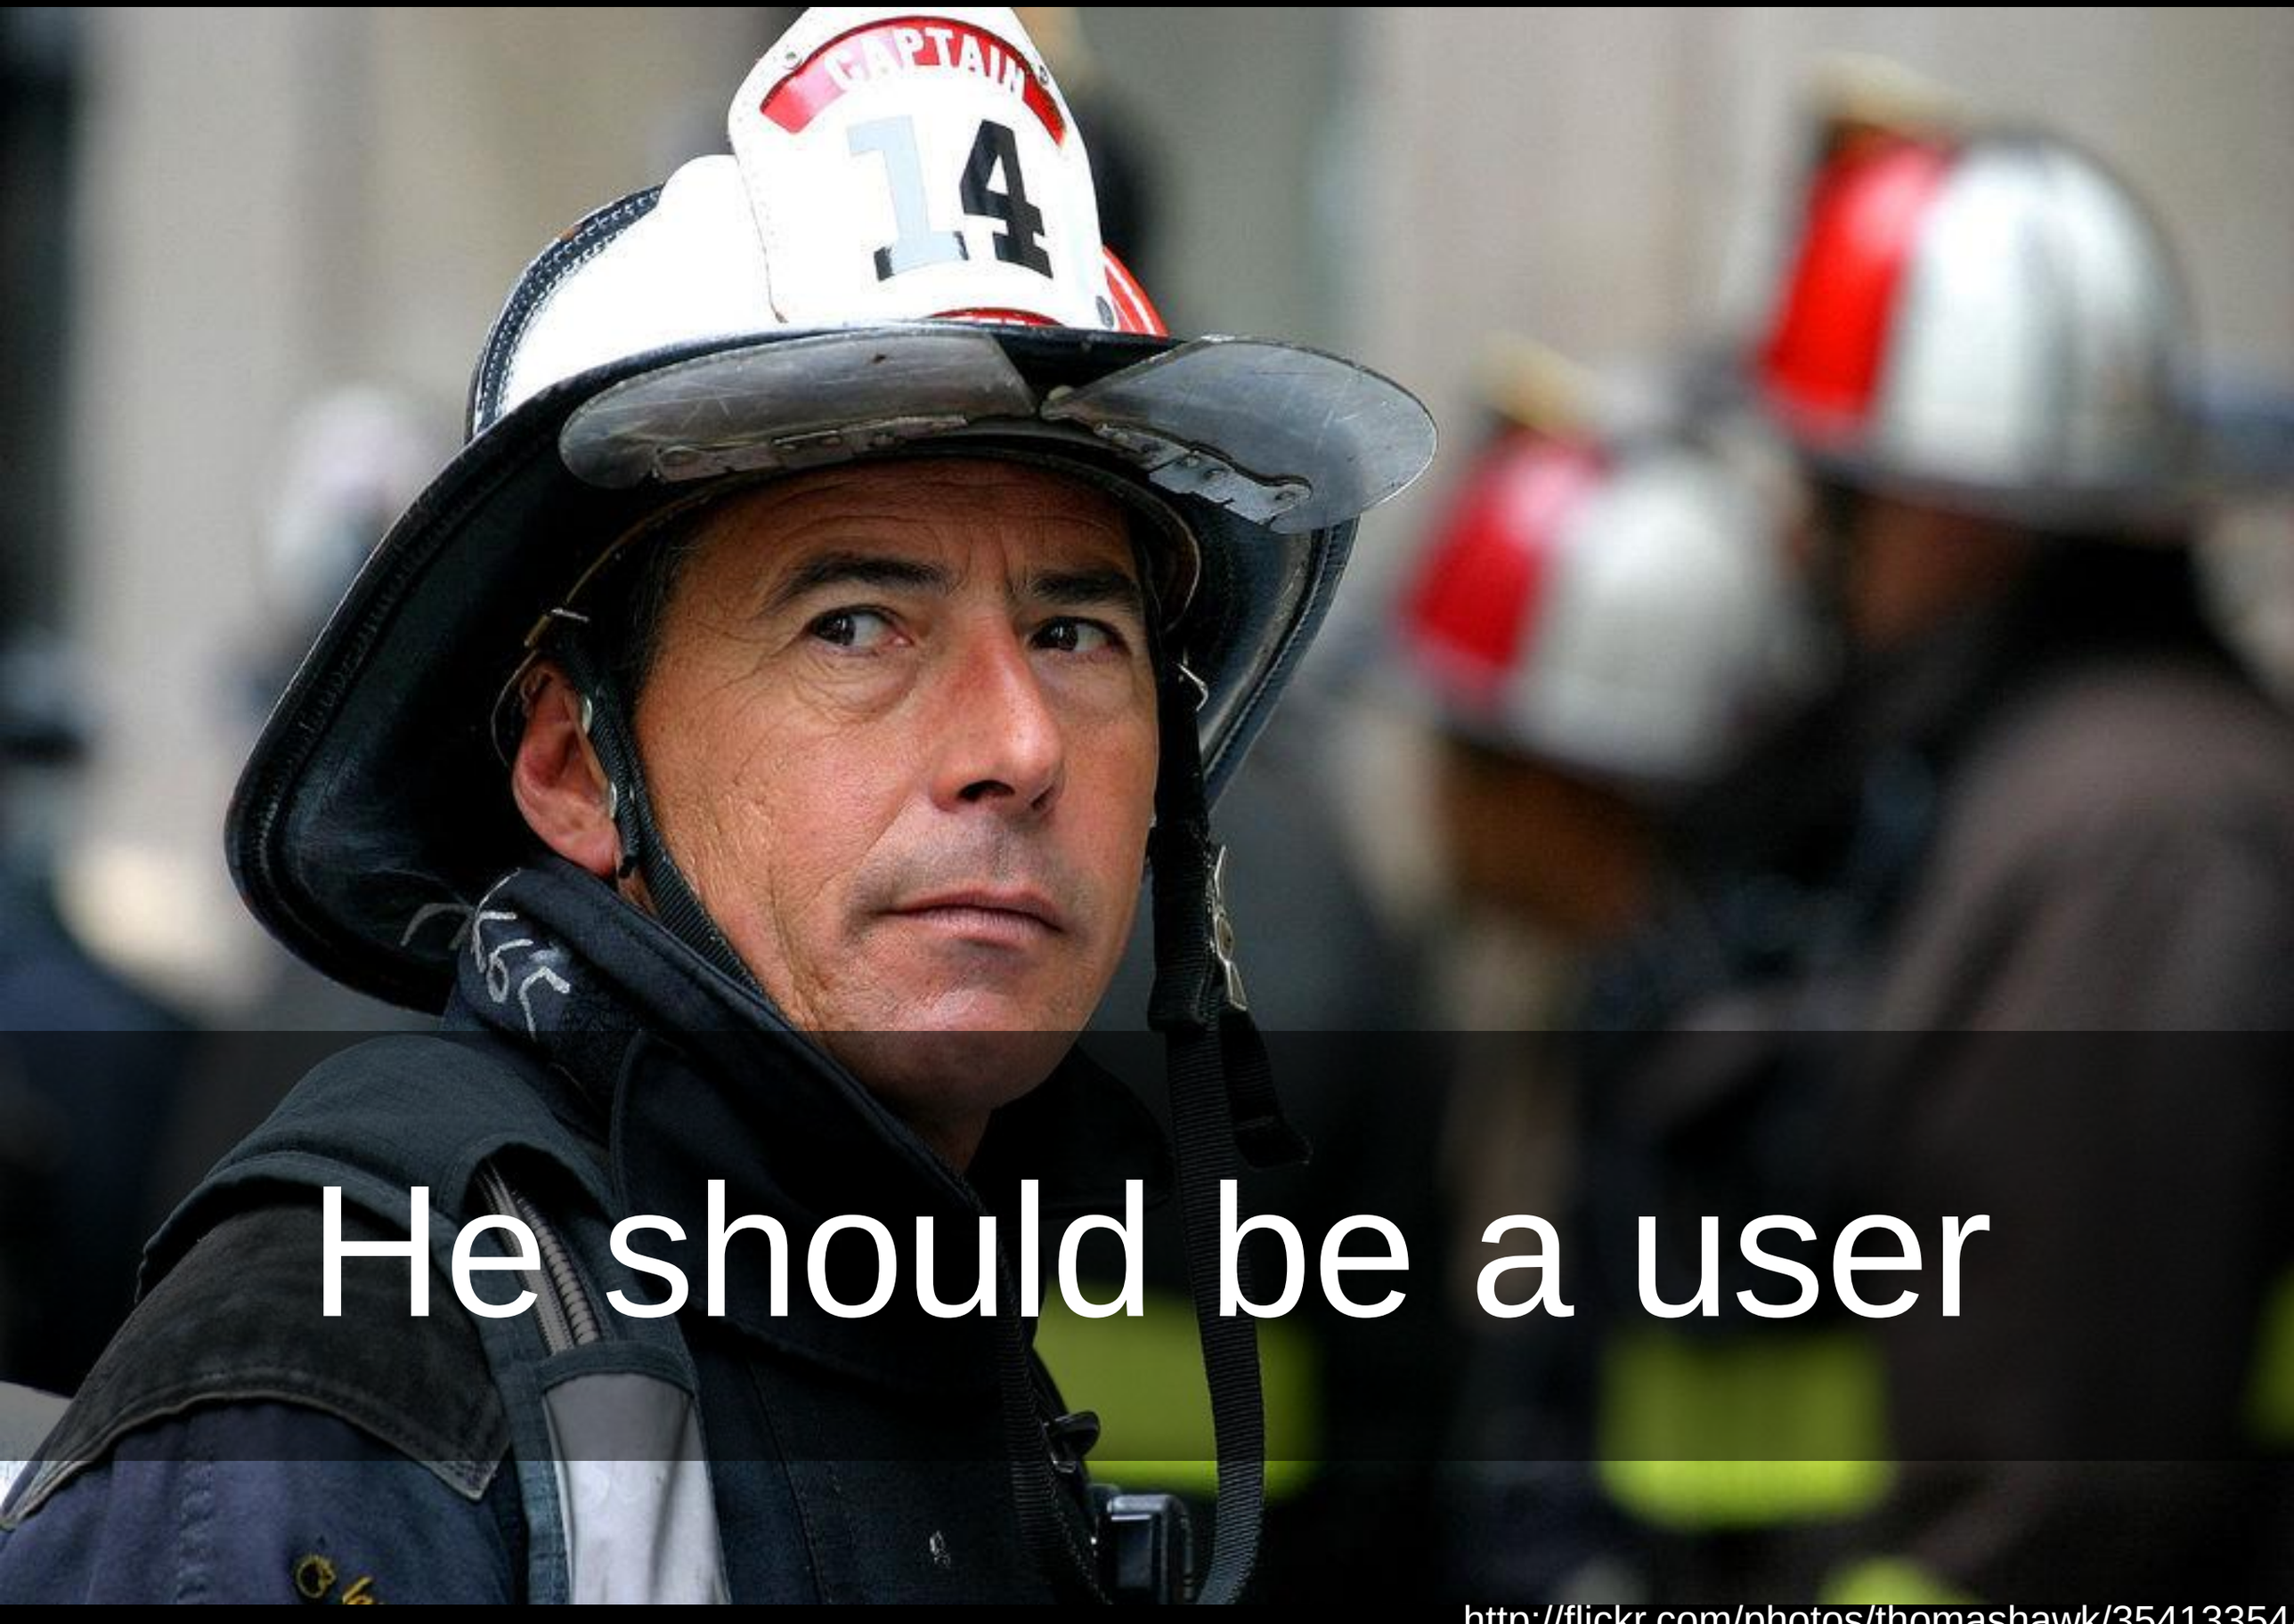


Is this the user?



This is the user

http://flickr.com/photos/ayula/55908651



He should be a user

http://flickr.com/photos/thomashawk/35413354/

She’s your next user

Mecklenburgh Street road barrier

Reported in the Roads/highways category by Andrew Ritchie at 01:28 today
Sent to Camden Borough Council 1 minute later

The road barrier at the northern end of Mecklenburgh Street normally provides access only for bicycles and emergency vehicles. The removable central pillar has disappeared, now allowing cars to drive through, often at speed. Mecklenburgh Square is thus being used as a short cut by cars, thereby making pedestrians vulnerable in this quiet square. Could the central barrier please be reinstalled?

Portland Radical History - Tour

Legend: My Places

Jason's Portland Radical History - Tour map

Publish Email Fullscreen

This is a **closed** map. Only jason can add Places.
It's been seen 872 times.

The following sites were selected and the text written by Kim Fern. The supporting material, including photos and web links, was added by members of the Lewis and Clark College Political Economy Program. As Kim Fern explains, "This tour is an attempt to show you some of what isn't shown, what has been left out of our city's heritage and our "movement's" memory. This is for you to take to the library or the Historical Society or to the City Archives and spend hours finding details that make your heart race. This will show you people, organizations, groups, and events that have inspired and changed us."

There are many stops which have, unfortunately, been torn down. Those stops are marked with an asterisk (*).

What is Mapufacture?

Mapufacture is a geo-aggregator. Find interesting feeds from blogs, photos, weather, friends, and activities. Build maps of the places you care about. Share these maps and use them on the go. Search for interesting around the world.

What's going on here?

Better Browsing
Changes are already on the loose. Browse Feeds and Browse Maps have received some UI niceness, so finding the geo content you're after is just a little bit easier. And it's just getting started...

Fresh
Just getting a feel for our new voice box, and our new home. Mapufacture is on new and crucially more reliable hosting. And we're gearing up to for a flurry of

San Diego County Fires - KPBS Online

Updated 11/01/07.
All evacuation orders have been lifted.
Fire status will continue to be updated until all fires are out (click on fire icons for text pop-ups).
Fire perimeters (not active burn areas) are based on County Emergency Operations Center data. They are no longer being updated.
Thanks to our friends at SDSU's Geography department for their assistance.

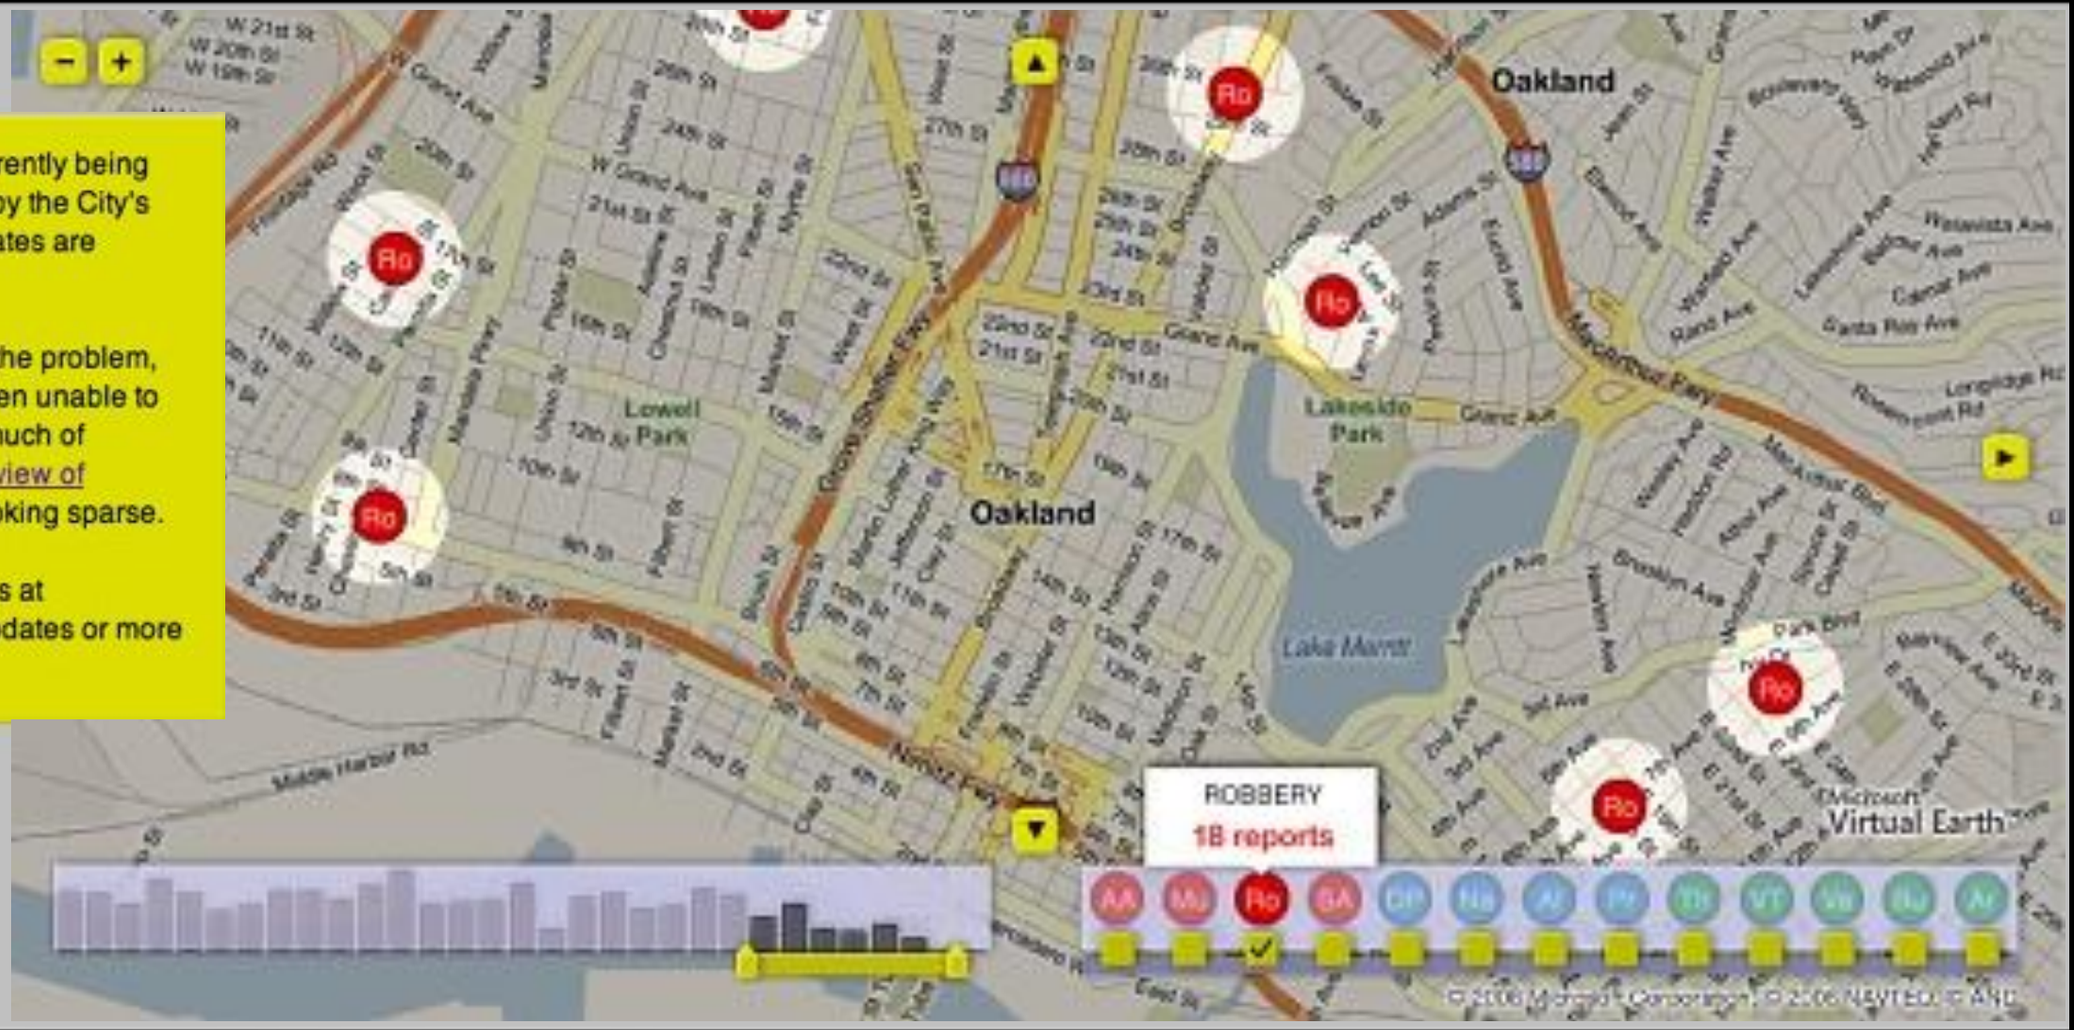
Oakland crimespotting

Oakland Crimespotting is currently being blocked from collecting data by the City's *CrimeWatch* website, so updates are sporadic and incomplete. We're working to fix the problem.

Oakland Crimespotting is currently being blocked from collecting data by the City's *CrimeWatch* website, so updates are sporadic and incomplete.

We have been working to fix the problem, but unfortunately we have been unable to reliably gather new data for much of October, and our one-month view of Oakland's crime reports is looking sparse.

Check back here or contact us at info@crimespotting.org for updates or more information.



***Oakland Crimespotting* is an interactive map of crimes in Oakland and a tool for understanding crime in cities.**

If you hear sirens in your neighborhood, you should know why. *Crimespotting* makes this possible with interactive maps, e-mail updates, and RSS feeds of crimes in areas that you care about.

We've found ourselves frustrated by the proprietary systems and long disclaimers that ultimately limit information available to the public. As citizens we have a right to public information. A clear understanding of our environment is essential to an informed citizenry.
