

This supplement contains a **Summary of the Stimuli** used during interactive book reading treatment.

- A Book title
- B Book's author(s) and publication date
- C Target word
- D Part of speech of the target word (i.e., noun, verb, adjective) based on the use of the word in the book
- E Word frequency count based on data from Kolson (1960) and Moe, Hopkins, & Rush (1982) further described in Storkel & Hoover (2010), *Behavior Research Methods*.
- F Definition of target word used during treatment, which was created by identifying common definition elements across multiple children's dictionaries. Word frequency is shown in parentheses.
- G Total number of words in the definition
- H Average word frequency for the definition, calculated by dividing the sum of the frequency counts by the total number of words for which frequency is reported
- I Synonym of target word used in treatment and frequency count in parentheses
- J Total number of synonyms for a target word
- K Frequency count of the synonym
- L Context sentences used in treatment with frequency counts in parentheses
- M Total number of words in the context sentence
- N Average word frequency for the context sentence, calculated by dividing the sum of frequency counts by the total number of words for which frequency is reported
- O Text sentence from the storybook listed in A with frequency counts in parentheses
- P Total number of words in a text sentence
- Q Average word frequency for a text sentence, calculated by dividing the sum of frequency counts by the total number of words for which frequency is reported
