Editor, *Kansas Statistical Abstract*, 1985-2003
Data Collection, 1978-2003
Librarian, 1976-2003

The 54th Edition of the *Kansas Statistical Abstract* is dedicated to the memory of Thelma Helyar, Editor of the KSA from 1985 to 2003 (21st-37th Editions). Thelma worked at the Institute as a librarian from 1976 until her retirement in 2003. She was born in Carshalton, Surrey, England on April 30, 1929 and died November 16, 2019 in Lawrence, Kansas. The Institute is grateful for her years of public service and her dedication to answering the many phone calls requesting data on Kansas.

Preface

We are pleased to present this 54th Edition of the *Kansas Statistical Abstract (KSA)*. The KSA is compiled and published annually by The University of Kansas Institute for Policy & Social Research (IPSR).

The KSA Editorial Board extends a thank you to the many agencies that provided data for the KSA either personally or by making their data readily available on the internet. Sources for each table or graphical representation are noted herein.

We thank IPSR student assistant Abigail Byrd, who provided assistance with visualizations, data entry, and table preparation. We also thank Whitney Onasch, IPSR, for her assistance with data collection.

Finally, we hope this edition of the *Kansas Statistical Abstract* will serve as a valuable resource especially during this unprecedented time of pandemic. The Institute for Policy & Social Research has been tracking the impact of COVID-19 on the state of Kansas and developed a website to provide resources for people to see how COVID-19 has affected the state and its economy. In addition, research presentations explain how policy may affect economic impact on the state. Please check out our COVID-19 resource page at: <https://ipsr.ku.edu/covid19/>.

Please let us know if there are ways that we can improve the KSA or our COVID-19 website.

On behalf of the Editorial Board,

Jena Gunter, Project Leader
Assistant Director
Institute for Policy & Social Research

Table of Contents

The Table of Contents panel contains links to each individual section or chapter in the *Kansas Statistical Abstract*. Click the > symbol next to any chapter to expand the list of the tables in the chapter. Then click on the title of the table to automatically go to that table in the document.

Limitations of the Data

Some data in the *Kansas Statistical Abstract* are subject to sampling variability; see source for complete methodology and sampling information.

Data from the American Community Survey are associated with a 90% margin of error. We recommend calculating the coefficient of variation to determine the relative amount of sampling error for an estimate and using the following guidelines:

Coefficient of Variation (CV)	Reliability
Less than 12%	Reasonably reliable
12–40%	Use with caution
Greater than 40%	Do not use

Calculating the Coefficient of Variation (CV):

$$CV = ((MOE_{ACS} / 1.645) / EST_{ACS}) * 100$$

where MOE_{ACS} is the 90% margin of error and EST_{ACS} is the data estimate.

Data may not sum to totals due to rounding.

Use caution when comparing estimates across counties in the same year. These estimates are correlated because they depend on the same regression coefficients.
