

disenfranchised. While there are good reasons to question the last scope condition, the others are not problematic.

The theory develops the relationships between the market relations in the economy and the political and ideological structures clearly and will be useful to students. Nevertheless some will be disappointed at the apparent lack of relation of this chapter to the rest of the book. In part, the problem is intrinsic to the formal nature of the theory generated. The abstraction and formalism are not so much the problem as is the feeling that with the rich historical material covered the authors might have done more. The chapter reads too much like an addendum. In short, the final chapter could have been written quite apart from the earlier chapters. Consequently, one wonders if a different concluding chapter might have suited the rich historical material offered in earlier chapters. Ultimately, Turner, Singleton and Musick's book must be appreciated for its attempt to bring an historical perspective to race relations, although their own theoretical chapter is unnecessarily disengaged from that historical account. Nevertheless, *Oppression* is a useful contribution to the body of introductory texts on race relations.
