## Introductory Note

Miss Wilder's compilation, *University of Kansas Graduate School Theses, 1888-1947*, appeared in 1949 and almost at once proved to be as useful as had been predicted. Not only has it been an excellent reference book, but from it have been drawn materials for several articles on the development of graduate studies at the University of Kansas.

We are pleased indeed to have a second and continuation compilation from Miss Wilder. We are confident that it will, like its predecessor, be welcomed in many quarters.

J. H. NELSON,  
*Dean of the  
Graduate School.*

## Preface

This bulletin covers the theses which were submitted to the Graduate School of the University of **Kansas** in partial fulfillment of the requirements for master's and doctor's degrees from 1948 through 1958. The list supplements the list in *University of Kansas Graduate School Theses, 1888-1947*, which was published in 1949.

I wish to thank Professor Wealthy Babcock of the Department of Mathematics, Professor J. O. Maloney of the School of Engineering, and Mr. Roy Kidman, Miss Laura Neiswanger, and Miss Eva Morrison of the University Library staff, for their help in assigning subject headings for the theses.

I wish to acknowledge with deepest gratitude the assistance which I received from Dean John H. Nelson. His thoughtfulness and consideration have made the work on this publication **a pleasure.**

BESSIE E. WILDEB.
