CALL FOR PAPERS
and
ANNOUNCEMENT OF CONFERENCE

"LOGIC, LOGIC MACHINES, AND PUBLIC EDUCATION"

The Institute for Logic and Cognitive Studies, University of Houston - Clear Lake, invites submission of papers for presentation at its second annual conference. The theme of the conference will be "Logic, Logic Machines and Public Education." Session papers should be 12-15 pages in length (3 copies). Blind refereeing will be used to select papers for inclusion in the program. It is the intention of the Institute to publish selected papers in biennial proceedings. Proposals for symposia and workshops are also invited. In addition to logic and computer science, symposia proposals in any area of artificial intelligence including its history and philosophy will be considered. Proposals should be 3-5 pages in length. All papers and proposals should include biographical data on each presenter.

Deadline submission is March 31, 1985. The conference will be held in Houston, Texas, June 13-15, 1985.

For Paper submissions or further information, write:

Paul A. Wagner, Director
Institute for Logic and Cognitive Studies
University of Houston - Clear Lake, Box 269
2700 Bay Area Blvd.
Houston, Texas 77058
(712) 488-9274

CALL FOR PAPERS

The Seventh Annual Graduate Student Philosophy Conference
at
The University of Illinois at Urbana-Champaign

This year's conference will be held April 19-21 at the University of Illinois, Urbana-Champaign. Graduate students are urged to submit papers on any philosophi-
cally interesting topic; the papers should not exceed 20 minutes reading time (about 15 double-spaced pages). We are very pleased to add that Peter Winch will be a featured speaker at this year's conference.

Papers should be submitted in duplicate by January 15, 1985, to:

Vic Reppert  
Department of Philosophy  
University of Illinois  
105 Gregory Hall  
810 South Wright Street  
Urbana, Illinois 61801

Sponsored by the Graduate Student Association in Philosophy, University of Illinois, Urbana.

Conference on Critical Thinking  
Christopher Newport College  
April 11-12, 1985

Report after report on what ails education in the U.S. calls for more emphasis on reasoning and critical thinking. The goal of this conference is to direct the attention of educators, humanists, and scientists to recent work on critical thinking and informal logic that might help us better address these needs.

Our speakers are nationally and internationally prominent for their original work in developing these fields. They combine classroom experience teaching critical thinking from primary school through community college to university level.

MICHAEL SCRIVEN. Author of REASONING (1976), he is in important ways the founder of the informal logic movement as it exists today. He will point out some of the shortcoming of recent symbolic logic in dealing with arguments in ordinary language, and then indicate what is needed to do the job better.

ROBERT H. ENNIS. A leading authority on conceptualizing and testing critical thinking, he is co-author of two widely used testing instruments in the field (Cornell Critical Thinking Tests). He will elaborate and illustrate a concept of critical thinking to show us what critical thinking involves.

MATTHEW LIPMAN. Founder of the Institute for the Advancement of Philosophy for Children, he has produced such excellent teaching materials for critical thinking
for children as HARRY STOTTLEMEIER'S DISCOVERY, with its outstanding Instructor's Manual. He will describe the critical thinking for children program he has devised, which has dramatically raised scores on critical thinking tests, and report on recent projects at his Institute.

RALPH H. JOHNSON or J. ANTHONY BLAIR. As co-editors of the journal INFORMAL LOGIC they will be able to give us an overview of what informal logic has accomplished in the recent past. As co-authors of LOGICAL SELF-DEFENSE (1983) they will discuss what the ideal course on informal logic or practical reasoning would contain.

PHILIP PECORINO. Director of Critical Thinking Workshops for the Community College Humanities Association and the American Association of Philosophy Teachers (of which he is currently president), he will demonstrate with examples how an informal logician analyzes an argument: the techniques employed, the factors considered, and evaluating the argument.

A number of workshops are planned to treat specific topics for smaller groups. Some will run concurrently. Among the topics we hope to treat are: a survey and critique of currently available critical thinking tests; critical thinking material for primary and secondary school and how to use it; problems of and strategies for getting critical thinking into the curriculum; problems that arise in informal argument analysis and how to deal with them.

The conference will wind up with a panel discussion. Each main speaker will be asked to address any important points he feels have received inadequate coverage.

Ample opportunity will be provided for those attending the conference to ask questions and provide input: after each presentation, at the workshops, and at the panel discussion.

With the cooperation of publishers, we hope to get a good range of commercially available teaching material for critical thinking and informal logic on display. Material important to the presentations and workshops will be copied for the kits of those attending, so long as it is not restricted by copyright.

This conference is presented under the auspices of the Association for Informal Logic and Critical Thinking, and in conjunction with the annual meeting of the Virginia Humanities Association.

For further information contact:
UPCOMING THEMATIC ISSUES OF THE JOURNAL OF MEDICINE AND PHILOSOPHY

The Journal of Medicine and Philosophy will be pleased to receive articles for consideration for publication in upcoming thematic issues of the Journal. Those interested in preparing an article for upcoming thematic issues should contact the issue editors listed below for further information. Closing dates for receipt of manuscripts are indicated in parentheses.

"Rationality and Medicine"
Professor K. Danner Clouser
Department of Humanities
Milton S. Hershey Medical Center
College of Medicine
Pennsylvania State University
Hershey, Penn. 17033 U.S.A.
(September 1, 1985)

"Ethical Issues in the Use of Clinical Controls"
Professor Kenneth F. Schaffner
Department of History and Philosophy of Science

190 Old Derby Street
Hingham, MA 02043
Telephone: (617)749-5262

The Thought of Martin Heidegger
Michael E. Zimmerman, Editor
Tulane Studies in Philosophy, Volume XXXII

In recent years, Heidegger's thought has become increasingly important for philosophers representing many traditions, including those involving analytic methods. The present volume includes essays by authors who are in the forefront of the dialogue between continental and analytic philosophy. Along with treating issues concerning the foundations of and problems posed by Being and Time, the present collection of essays also addresses important topics form Heidegger's later thought. Each essay makes an original contribution to our understanding of one of the most significant thinkers of the twentieth century.

Contents

439
Introduction
Michael E. Zimmerman, Tulane University

"Supposing Truth to be a Woman . . .": Heidegger, Nietzsche, Derrida"
John D. Caputo, Villanova University
