**PAGE 1: K-12 School Partnership 2015-2016 Application**

**Q1: Please include your contact information**

Name:	Renee Lott
Institution:	Oakwood Elementary
Address:	5815 South Highland Drive
City/Town:	Cottonwood Heights
State:	UT
ZIP/Postal Code:	84121
Email Address:	rjlott@graniteschools.org
Phone Number:	3856464942

<b>Q2: Are partners Full or Affiliate members of the National Network of Libraries of Medicine, MidContinental Region?</b>	Yes
--	-----

<b>Q3: Project Title</b>	Community Health Program
--------------------------	--------------------------

<b>Q4: Project Leader (person responsible for submitting reports and invoices)</b>	Renee Lott
--	------------

**Q5: Summary: A one paragraph summary statement of the proposed project.**

We will have a computer monitor in the busiest area of our school, the entryway, with a slideshow containing different health focuses. The theme will be changed monthly and vary in health subject matter. Some of the subjects will focus on Nutrition, Diabetes, Social, Emotional and Physical Health, Exercise, Genetics, Hygiene, Environmental, Personal and Physical Safety, Growth and Development, Stress Management, Social Skills and other subjects from the K-6 Health Curriculum. The monitor will be interactive so that involvement between the community and school is encouraged. There will be questions that students, teachers and the community can answer and then their returned papers will be entered into a monthly drawing for prizes such as jump-ropes, skateboards, frisbees, hula-hoops, balls, jump house and Jamba Juice gift cards and other various things that encourage movement and/or a healthy lifestyle. All of this will be optional, but there will be a lot of participation because of the location of the monitor and the interesting subject matters and extrinsic as well and intrinsic rewards.

**Q6: List up to three project objectives.**

1. To involve the community as they come in and out of the school.
  2. To inform students on how to be health conscious.
  3. Motivate kids to become more active.
- 

**Q7: How will you evaluate the project?**

We will use survey monkey to send out surveys school wide and throughout the community to get a sense of how many are involved. In the survey we will ask questions such as:

1. Have you seen the monitor this month?
2. Have you learned anything new from it?
3. Have you had any discussions with your children about anything you read or saw on the monitor?
4. Have you implemented anything you read or saw on the monitor?
5. If so, what?

We will also evaluate it using the monthly drawings to get another sense of involvement. The questions we ask for the monthly drawings will be focused on things the students saw on monitor.

---

**Q8: How will the project funding be allocated?**

We will use the money to buy the computer programs and monitor through TV Specialists and to purchase monthly rewards for the drawings.
