Total: \$2,500 maximum	\$	2,500.00				

*Do not include overhead in the amount budgeted for equipment.

** Overhead may be included if desired, based on normal organizational rates and practices. If used, overhead calculations must be included in the \$2,500.00 total.

Appendix A Statement of Work

Mid-Missouri AHEC Outreach

The intention of this project is for the Mid-Missouri Area Health Education Center to provide outreach and evaluation services to targeted populations in Mid-Missouri. The focus will be on rural health care providers and their patients and rural county public health departments. The program will involve assessment and evaluation, consumer health information, education, public health, and technology. The principal investigator will work with Community Based Organizations, Local Departments of Health, and Support or Advocacy Groups (all listed in the grant proposal).

During the project period, the principal investigator will provide 15 demonstration and/or training sessions (some that also include evaluation). The training sessions will include:

- Searching MEDLINE using PubMed
- Obtaining consumer health information using MEDLINEplus
- Introduction to health resources on the Web
- Introduction to using the Web
- Evaluating health information on the web

Deliverables

Deliverables to be submitted to the NN/LM-Midcontinental Region in Salt Lake City, Utah and copied to Deborah Sommer at the J. Otto Lottes Health Sciences Library at the University of Missouri include:

- Quarterly reports
- An Outreach Reporting Form for each session
- A final report
- Promotional materials developed for the project
- Training materials developed for the project

Reviewers' Comments

The reviewers strongly believe that your partner organizations and professionals will benefit from your training and demonstrations. They are concerned that your project is very ambitious and you may have difficulty visiting all the organizations. As you get into the project you may want to reduce the number of presentations and increase follow-up with those you have worked with. The follow-up will help you evaluate the impact of your training and plan for future outreach activities.
