Our second quarterly report consists of the following documents and reports:

2. Evaluation Tool - Consumer Health Education and Promotion Project Evaluation of Presentation

4. Outreach Report – Cedar County, Missouri - Community Health Assistance Resource Team (CHART)

5. Outreach Report – Springfield, Missouri – Springfield-Greene County Library

6. Slide Handouts for Presentation

Consumer Health presentations during the reporting period include:

2. The Education Committee of St. John’s Foundation for Community Health, February 4, 2003
4. Displayed at Health Expo, Springfield Greene-County Library Center, February 15, 2003
5. Cedar County CHART, March 6, 2003
7. Springfield-Greene County Library, March 24, 2003

Consumer Health Projects under investigation:

1. The library staffs of St. John’s Health System and the Springfield-Greene County Library District are working on the development of a Health Information Packet project. To date, 12 health packet topics have been identified for possible development and a proposal has been presented to the
newly organized St. John's Foundation for Community Health as a project that might consider for funding.

Forthcoming consumer health programs that are scheduled:

1. Child Care Seminar, Southwest Missouri State University, April 5, 2003
2. Ozarks Health Services Clinic Managers’ Meeting, Rolla, Missouri, April 23, 2003
3. Webster County Public Library, Marshfield, Missouri, April 24, 2003

All documents and reports are respectfully submitted by:

Outreach Contact:

Community Health Assistance Resource Team (CHART)
Cedar County, Missouri

Location and Date of Presentation:

March 6, 2003: 12 noon
Cedar County Health Department
El Dorado Springs, Missouri

Attendees:

A total of 17 people were in attendance at the presentation. The group was composed of:
- Cedar County Health Department employees
- Head Nurse, Cedar County Hospital
- Director of Community Development, Citizens Memorial Healthcare, Bolivar, Missouri
- Prevention Specialist, Pathways Community Behavioral Healthcare, Clinton, Missouri
- Community Support Consultant, Missouri State Department of Health and Senior Services
- Representatives of local support/service organizations

Presentation Structure and Content:

A multimedia PowerPoint presentation was utilized to provide information on:
- St. John’s Community Health Library services and resources
- Searching the library’s online catalog, Coolcat
- Searching MEDLINEplus for health information, this segment also included the use of a 5 minute CD-ROM with Quicktime. This CD-ROM was produced by the National Library of Medicine and provides a succinct introduction to MEDLINEplus.
- Navigating the St. John’s Libraries website
Questions were answered throughout the PowerPoint presentation as well as at the end.

The final portion of the presentation included a brief summary the library’s promotional items available for the attendees use. These include: library brochures, library bookmarks, MEDLINEplus bookmarks, posters, library resources guides, prescription for information notepads, pens. The Cedar County Health Department took a number of items for their upcoming health fairs in April and May.

Attendees were asked to complete an evaluation form regarding the presentation. 14 evaluation forms were returned.

**Conclusion:**

The first presentation to support the Consumer Health Education and Promotion Project went extremely well. This presentation was made possible as a result of a drop-in visit to the Cedar County Health Department, Stockton, Missouri on February 12, 2003.

Initially, two presentations were scheduled. The first was scheduled to take place on March 5, 2003 in Stockton, Missouri but was canceled due to weather conditions. The second, in El Dorado Springs, Missouri was completed as scheduled.

The group of attendees was extremely polite and highly interested in the content of the presentation. The introduction to MEDLINEplus was of great interest to the group. The only attendees that knew of St. John’s Community Health Library before the presentation were those members of the Cedar County Health Department that we had visited during our drop-in visit. The existence of the library was new information to the rest of the group.

Following the presentation several attendees took the time to introduce themselves and inquire about the possibility of future presentations for their organizations.

Outreach Report

Outreach Contact:
Springfield-Greene County Public Library

Location and Date of Presentation:
March 24, 2003: 7:00 p.m.
The Library Center
Springfield, Missouri

Attendees:
A total of 2 people were in attendance at the presentation.

Presentation Structure and Content:
This presentation was a joint effort with the Springfield-Greene County Public Library. Holly Peacock, of St. John’s, co-presented with Mary Harrison, health reference librarian at the public library.

St. John’s Presentation Content:
A multimedia PowerPoint presentation was utilized to provide information on:
• St. John’s Community Health Library services and resources
• Searching the library’s online catalog, Coolcat
• Searching MEDLINEplus for health information, this segment also included the use of a 5-minute CD-ROM with Quicktime. This CD-ROM was produced by the National Library of Medicine and provides a succinct introduction to MEDLINEplus.
• Navigating the St. John’s Libraries website

Public Library Content:
• Demonstration of consumer health internet resources available from the public library’s website.

Questions were answered throughout the presentation as well as at the end.
Attendees were asked to complete an evaluation form regarding the presentation. Two evaluation forms were returned.

**Conclusion:**

The second presentation to support the Consumer Health Education and Promotion Project went well, although attendance was much lower than expected. The presentation was advertised in the public library’s monthly calendar of events, as well as in an article in the local newspaper. A limited number of flyers were distributed through St. John’s, but the event could have been publicized much more. Steps will be taken to correct this for future presentations.

As a result of this presentation, there should be more opportunities to team-up with the public library to produce consumer health programs.
