**About Us****FROM HIGH SCHOOL STUDENT TO MEDICAL STUDENT**

**The UMKC School of Medicine** has always been ahead of the curve in training physicians. Founded in 1971 as a groundbreaking experiment in a new model of medical education.

High school graduates become medical students as soon as they enter the UMKC School of Medicine. Immediate exposure to a curriculum that builds a basic foundation in medical science and clinical skills is integrated with the liberal arts and humanities into a year-round program. This allows students to earn their B.A./M.D. in six years.
